

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Previously Presented) A carrier of a distribution point in the field of telecommunications, the carrier having a generally open, frame-like structure with at least three substantially parallel bars arranged in at least two planes, the bars being maintained in a fixed relationship to each other, and at least one of the bars being adapted to mount telecommunications modules thereon.
2. (Previously Presented) The carrier according to claim 1 wherein the carrier comprises at least four substantially parallel bars defining, as seen in a cross-section, a rectangular structure.
3. (Previously Presented) The carrier according to claim 1 wherein the bars have a profiled cross-section.
4. (Previously Presented) The carrier according to claim 1 wherein the bars are connected by plates.
5. (Previously Presented) The carrier according to claim 1 wherein the carrier further comprises at least one adapter which is attachable to a bar and adapted to mount the telecommunications modules thereon.
6. (Previously Presented) The carrier according to claim 5 wherein the adapter is attachable to a bar by being slid into a profiled section of the bar.
7. (Previously Presented) The carrier according to claim 1 further comprising at least one printed circuit board.

8. (Previously Presented) The carrier according to claim 1 further comprising at least one guiding element attachable to at least one bar.
9. (Previously Presented) The carrier according to claim 8 wherein the guiding element is adapted to guide a printed circuit board.
10. (Previously Presented) The carrier according to claim 8 wherein the guiding element is adapted to guide a wire guide.
11. (Previously Presented) The carrier according to claim 8 wherein the guiding element is adapted to guide a printed circuit board and one or more cables in parallel directions.
12. (Previously Presented) The carrier according to claim 8 wherein the guiding element comprises at least one opening.
13. (Previously Presented) The carrier according to claim 1 further comprising at least one wire guide.
14. (Previously Presented) A distribution point in the field of telecommunications comprising at least one carrier according to claim 10 and at least one telecommunications module.
